

Malachi is a program director at a community development organization in Northwest Detroit. Participation in their community meetings has been low for the last year.

## Get Curious!

Identify a problem you have or something you're curious about:

We don't have great community engagement with our CDO.

Turn it into a question:

How many of our residents participate in community events?

## Find Data!

Malachi navigates to the website [nvidetroit.org](https://nvidetroit.org)

Malachi finds a **map** that allows him to look at a geography that is a little bit bigger than his CDO's service area.

Click on a **Neighborhood Zone** to view its data

In the **Community Capacity** section, Malachi finds that 68% of the residents participate in any sort of community group.

## Community Capacity

- 78% Plan to stay in the neighborhood through the next 12 months
- 26% Have sufficient access to support systems
- 54% Are involved in a community engagement process
- 69% Participate in block/ neighborhood/ community/ school groups
- 59% Are involved in addressing neighborhood conditions

As Malachi scrolls through the NVI website, he sees some interesting facts about his community:

59% Are involved in addressing neighborhood conditions

92% Have lived in the City for at least six years

78% Feel safe in their neighborhood

76% Get the social and emotional support they need

47% Are satisfied with retail and service amenities in their neighborhood

69% Feel safe in public spaces

## Act On It!

Given the low satisfaction with retail and service amenities, Malachi thinks this might be a topic of interest for residents in his area. He clicks on the **NVI network map** to find who in Detroit is working on those topic areas and reaches out to Motor City Match to invite them to the next community meeting.

*How can we increase businesses in our neighborhood?*

## Dive Deeper

Malachi finds that while most residents have access to internet at home, many respondents have concerns about using computers, and **requests access** to the deep dive data on the NVI website to learn more.

## Youth Quality of Life

### Want to dive deeper into data for your neighborhood?

If you work for a Detroit-based organization and would like an account to view more information, [let us know!](#)

Learn more about housing by exploring the [Housing Information Portal!](#)

Find out more about the welfare of children and families in Detroit with [State of the Detroit Child 2.0!](#)

The more detailed survey data shows the top concerns are protecting personal and financial information online. Malachi decides to find a data protection expert to come to the neighborhood to give a workshop.
